

Ali Saab

Phone:(+961) 76 773 487

Lebanon, Beirut

A software engineer passionate about creating intuitive digital experiences. Skilled in full-stack web and mobile development, with a focus on integrating AI solutions into projects. Known for writing clean, maintainable code and collaborating effectively within Agile teams to deliver innovative, high-quality products.

Projects

1-Hotel du lac —(Freelance):

A luxury hotel website for a 3-star lakeside hotel in Cotonou, Benin. Features online room booking, multilingual support (EN/FR), currency switching, and an admin dashboard to manage rooms, restaurant, events, and gallery content.

[Click here to view the project](#)

2-SwipeWise —(Senior Project):

SwipeWise is an AI-powered service exchange platform enabling professionals to trade skills without monetary payments.

AI analyzes posts and comments to verify content quality and relevance.

Intelligently matches users based on complementary skills and project needs.

[Click here to view the project](#) (links not working at the moment)

3-HAS Computers —(Personal Project):

HAS is an AI-powered eCommerce platform for PC hardware and custom pc builds.

Enables users to build PCs based on their budget using intelligent component recommendations.

Supports standard online shopping with a seamless and user-friendly experience.

[Click here to view the project](#) (links not working at the moment)

4-Resto Menu —(SaaS):

A Smart restaurant menu platform with an AI-powered virtual waiter.

AI recommends food based on user preferences and time of day.

Includes an admin dashboard to manage menu content and customize restaurant styling.

5-Zoobot—(NLP Course Project):

ZooBot – NLP/ML-based chatbot that educates users about animals, including diet, habitat, and key facts.

Engages users in conversational learning using natural language understanding.

Dynamically expands its knowledge by fetching missing animal data via the ChatGPT API and storing it in a database.

6-Real Estate Website —(Internship):

Developed a real estate platform using WordPress.

Built two versions: one using standard WordPress tools and another as a fully customizable custom theme.

Enabled dynamic property listings with an admin-friendly, editable layout.

7-Case Saab—(Game):

Case Saab is an AI-powered investigative mystery game where players step into the role of a detective and work to crack complex cases through logic, exploration, and conversation. Whether going solo or teaming up with friends, every session is a unique challenge driven by artificial intelligence.

At the heart of the experience is a dynamic interrogation system — players can hold real, open-ended conversations with AI-driven characters, each with their own personalities, secrets, and motives. Ask the right questions, read between the lines, and piece together the truth before time runs out.

Note: The following are selected key projects. Additional projects include a Banking System (PHP, HTML, CSS, JavaScript), an FPL AI Assistant (Python, HTML, CSS), a Videographer Portfolio([Link](#)), a Streaming Services Store ([Link](#)), Case and POS Web Systems.

(links not working at the moment)
